## THE STONE HOUSE

### ARCHITECT

Shailesh Devi

### LOCATION

Grape County, Nashik

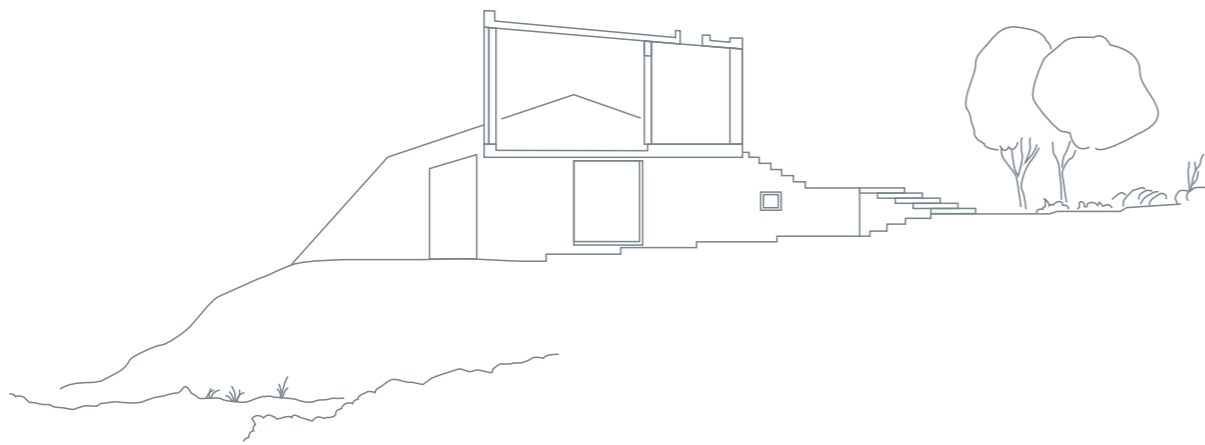

## ECO LIVING CONCEPTS BY GREEN SPACES

The Eco-Living Concepts by Green Spaces is an endeavour to re-establish the authentic coexistence between man and nature by adopting and designing homes considering the topography and ecology of the land so that the natural contours are not disrupted. Under this concept, each home is uniquely handcrafted with least invasion and maximum use of natural light and resources. These healthy and ecologically responsible homes are a synthesis of pure lifestyle and luxury to rebuild the sync between nature and man.

## THE WEALTH OF MOUNTAINS

Stone House, the house inspired by hills and mountains reconnects the bond between man and nature. The house with the native flavour of the place is perfect for a contemporary lifestyle.

## INTERIOR

Since the Stone House has a gorgeous exterior, the interior of the house is kept minimal and simple. The house has a courtyard in the living room to give access to the unfolding view of a dense forest and a lake from the center of the house. With spacious and natural light-filled rooms, the Stone House is ideal for experiencing a pure lifestyle with luxury and comfort.

## ARCHITECTURE

The Stone House design is adapted to sync with the topography and climatic condition of the place. As the name suggests, the house is constructed mainly from stones to give a traditional touch of the place while maintaining magnificence in its structural design.
